

CG-Real Creation: Omar and his Skyhook

Directed and Produced by Doug Purver

September 14, 2009 - 17:56

This short is the story of a young boy yearning to go on his first fishing trip with his grandpa. when his wish is denied, Omar finds the courage and mischievously steps out alone into the unknown world. when he lands his first catch, an unsuspecting predator swoops in and takes Omar for the ride of his life.

The idea for omar came from a few different places. conversations about aerial photography, kite flying, and an unfounded obsession with fish. it was initiated, as part of an ongoing collaborative series, Psst... Pass it On! when it was realized that Omar's story had a little more to offer, it became its own, full length piece.
