

Updated: A Christmas Carol. CG Film

The film is written and directed by Robert Zemeckis, and stars Jim Carrey in a multitude of roles

October 20, 2009 - 10:29

A Christmas Carol is a 2009 film adaptation of Charles Dickens' 1843 story of the same name. The film is written and directed by Robert Zemeckis, and stars Jim Carrey in a multitude of roles, including Ebenezer Scrooge as a young, middle-aged, and old man, and the three ghosts who haunt Scrooge.

The 3-D film was produced through the process of performance capture, a technique Zemeckis has previously used in his films *The Polar Express* (2004) and *Beowulf* (2007).

A Christmas Carol began filming in February 2008, and will be released on November 6, 2009 by Walt Disney Pictures. It will receive its world premiere in London, coinciding with the switching on of the annual Oxford Street and Regent Street Christmas lights, which in 2009 will have a Dickens theme.

The film will be released in Disney Digital 3-D and IMAX 3-D. It will also be Disney's third retelling of A Christmas Carol in 26 years, having released Mickey's Christmas Carol in 1983 (using the in-house Mickey Mouse & Donald Duck characters) and later distributing *The Muppet Christmas Carol* for Jim Henson Productions in 1992, with Disney later acquiring the rights to *The Muppets* from Jim Henson Productions.
