

## Imaginary Forces Created the Terminator Vision Effects

***Director McG Called on Imaginary Forces to Develop a Language for How these New Terminators See the World***

June 25, 2009 - 21:16

Machine Vision is the look and feel of how the Terminator robots see the world in the latest installment of the Terminator franchise, Terminator Salvation.

Imaginary Forces broke down the visual spectrum to design Machine Vision, developing the language of these special effects sequences. Using new tools for IF, such as a depth cameras that breaks down footage into data point 3-D imaging, Machine Vision creates a terrifying new take on these killer robots.

Client: The Halcyon Company and Warner Bros.

Director: McG
