

## James Cameron's Vision Featurette. HD Video

*In Theaters: December 18th, 2009*

November 23, 2009 - 17:52

Avatar takes us to a spectacular world beyond imagination, where a reluctant hero embarks on an epic adventure, ultimately fighting to save the alien world he has learned to call home. James Cameron, the Oscar-winning director of "Titanic", first conceived the film 15 years ago, when the means to realize his vision did not exist yet. Now, after four years of production, Avatar, a live action film with a new generation of special effects, delivers a fully immersive cinematic experience of a new kind, where the revolutionary technology invented to make the film disappears into the emotion of the characters and the sweep of the story.
