

## Latest Works of "I Love Dust"

*Great combination of 2D and 3D techniques*

April 13, 2010 - 21:43

"I Love Dust" was started back in 2003 by Mark Graham and Ben Beach. They were both working for a fashion label and decided their time would be better spent on their own ventures.

This studio set up shop in a dusty studio space in Southsea, UK and went to work building a portfolio of initially local clients, but were soon working for some of the biggest companies in the world like coke, Bloomingdales and T-mobile.

They collaborate both in-house and with global brands, working together to create fresh, innovative design which makes up our award-winning portfolio.
