

Iron Sky. Independent Sci-Fi Film

The film is Finnish-German co-production with a budget of 6.5 million euros

May 20, 2010 - 09:45

Iron Sky is a scifi movie that takes place in the year 2018, when the Nazis, who fled the Earth to the dark side of the Moon in 1945, return to claim the Earth. It is directed by Timo Vuorensola.

The Story of Iron Sky

Towards the end of World War II the staff of SS officer Hans Kammler made a significant breakthrough in anti-gravity.

From a secret base built in the Antarctic, the first Nazi spaceships were launched in late '45 to found the military base Schwarze Sonne (Black Sun) on the dark side of the Moon. This base was to build a powerful invasion fleet and return to take over the Earth once the time was right.

```
div.overlay {

url('/videos/news/2010/may/ironsky.jpg') top center; } #splash, #player, #player embed, #player object {
width:560px; height:264px; }
```

Now it is 2018, the Nazi invasion is on its way and the world is goose-stepping towards its doom.

About the Film

Iron Sky is a science fiction comedy being produced by Energia Productions, Blind Spot Pictures and co-produced by 27 Films. At the moment, the production is gearing up with costumes being made, sets designed and plans being finalized. After the shoot we will enter a year long post production process.

The primary language of the film will be English with worldwide distribution, through theaters and via the Internet.
